Subject: RE: SAP and HASP for Lane Plating

Kenneth,

In briefly scanning the sampling and analysis plan that I received yesterday, it came to my attention that the SAP references a work plan for Lane Plating Works that was finalized in September (*Phase I Remedial Investigation Fixed Rate Work Plan for Lane Plating Works Superfund Site Dallas, Dallas County, Texas*) and a scoping meeting that was held on September 6. The TCEQ was not given the opportunity to review or provide comments on this work plan, or to participate in developing the initial RI scope of work for this site. The review timeframes you've requested are based on a site schedule and assume familiarity with documents that have not been provided. My concern is that it appears the scope was discussed and agreed on prior to the development of this SAP, and TCEQ was not given the opportunity to be a part of that process.

Please provide the September Work Plan as soon as possible so that I can begin review of both documents. I need the opportunity to review the Work Plan that the SAP references before I can review and provide comments on the SAP. Although the SAP discusses sampling locations/types/numbers/analyses/methods, etc., it does not discuss the reasoning behind the selection of certain analyte groups or sample locations. I need to know if the comments I provide in the SAP will be considered by EPA before the plan is finalized. Assuming the Work Plan can be provided this week, I can provide an expedited review on both documents and comments on the SAP by January 31.

Going forward, please include the TCEQ in scoping and scheduling discussions. I need to know in advance when reports are coming and when sampling events are scheduled.

Thanks,
Rebecca

I understand about the holidays but I am also trying to keep the project on schedule. Can we aim for the 18th and move it back another week if we absolutely have to? If yes then please let your risk assessors know the new date.

Thanks for verifying the mailing address.

January 11 will be very tight for me – there have been some recent urgent issues I've had to stop normal work for to address on some sites and have a bit of a backlog. I will also be out of the office from Dec. 21 through January 1 or 2. If we could extend the review time by a couple of weeks, it would be greatly appreciated. Please let me know if that works for you.

Thanks

Mailing address is correct.

Is January 11 ok? That is 30 days from now and I would like to stay on schedule if possible. At the same time a lot of people take leave during the holidays. Let me know if that will be a big problem for you.

Kenneth,

I just received the draft SAP this afternoon.

Yes, you will be receiving additional comments from the risk assessor. I am waiting on management to complete the review of the comments letter that includes everything and will send it to you as soon as I receive it back. Please confirm your mailing addresses (I will try to provide an email copy also):

Mr. Kenneth Shewmake, Remedial Project Manager
US Environmental Protection Agency, Region 6
Superfund Division (6SF-TR)
1445 Ross Ave., Suite 1200
Dallas, Texas 75202-2733

Thanks,
Rebecca

Rebecca,

You should have received the draft SAP for Lane Plating. I already sent a copy to Mike Cave. Please distribute to your risk assessors, and please send me any comments you have by January 11.

I have comments on the CSMTM from you, but I was expecting additional comments from the TCEQ risk assessor sometime tomorrow. Is that correct?
